

Shubham Raval

Full-Stack & Backend Engineer

shubhamkraval@gmail.com | +91 9328021918

Bhavnagar, Gujarat

Portfolio | GitHub | LinkedIn

Summary

Backend and full-stack developer with hands-on experience building production systems, API integrations, and automation pipelines. Strong focus on data integrity, performance optimization, and maintainable code. Comfortable working independently as a consultant and collaboratively in product teams.

Experience(2 years+)

Python Developer – FluentLeaf Infotech

Ahmedabad, Gujarat

Jul 2025 – Present

- Developing and customizing Odoo modules to streamline business operations and automate workflows.
- Building Python-based integrations to connect Odoo with external systems, ensuring seamless data flow.
- Implementing scalable solutions for order management, invoicing, and reporting to reduce manual effort.
- Collaborating with cross-functional teams to design and deploy features that improve efficiency and reliability.
- Enhancing performance of existing Odoo applications through optimization and maintainable code practices.

Backend Engineer – EvitalRx

Ahmedabad, Gujarat

Jun 2024 – Jun 2025

- Integrated Branch IO for dynamic link generation and improved referral attribution accuracy.
- Built Telegram automation for lead notifications, reducing manual follow-ups and improving response time.
- Introduced Redis caching to reduce DB load and lower API response times.
- Delivered backend improvements focused on scalability, observability, and reliability.

MERN Stack Intern – NCode Technologies

Ahmedabad, Gujarat

Nov 2023 – May 2024

- Contributed to responsive web applications using MongoDB, Express, React, and Node.js.
- Implemented REST APIs for product and order management; collaborated on frontend components with Bootstrap and Material UI.
- Worked with MongoDB Atlas and CI/CD deployment workflows.

Projects(8)

Q600 Industrial Ultrasonic Water Meter Calibration Dashboard

React.js, Python (FastAPI/Node Bridge), WebSockets, MySQL, Web-NFC, Core PCSC

Production-grade industrial test-bench system interfacing a web-based calibration UI with physical USB ACR1552U NFC Smartcard Readers. Implemented low-level hardware communication using Hexadecimal APDU commands to decode firmware barcodes, hardware versions, and modem statuses. Integrated a 15-Point Linear Splines (PWL) Math Solver to compute error percentage matrices and calibration factor offset curves (LUT) for precise water flow measurement. Designed real-time event logging via WebSockets for transponder tracking and automated secure data dumping into MySQL repositories.

Laxmi Beauty Parlour - Omni-Channel Booking & Client Portal

React 18, TypeScript, Node.js, Express, Supabase (PostgreSQL), Telegram MTPROTO

Architected a resilient full-stack scheduling platform with dual-layered database failover (Supabase + local fallback) ensuring zero downtime and 100% booking continuity during outages. Built a real-time notification broker using Telegram MTPROTO to syndicate customer details and cancellation routes to admin channels. Engineered an intelligent booking engine with collision prevention, dynamic duration calculation, and dual-barrier CAPTCHA review pipeline to block automated spam.

Demo: <https://anita-beauty-parlour.vercel.app/>

Zoho Books & MySQL Real-Time Sync

Python, Flask, MySQL, Zoho Books API, Webhooks, Redis

Reliable two-way sync for invoices, payments, and orders with idempotency, retry logic, and monitoring dashboards. Reduced reconciliation time and eliminated duplicate transactions.

E-Commerce Web App

Node.js, Express, React, MongoDB, MUI

Responsive storefront with cart, order flow, PDF billing and cloud-hosted DB (MongoDB Atlas). Implemented secure APIs and server-side PDF generation.

RedditReels

Flask, Python, Reddit API, YouTube Data API, MoviePy, AWS

Automated pipeline to fetch Reddit content, generate short videos, and upload to YouTube; includes meta-data normalization and scheduling.

ChatPDF

Python, OpenAI API, Transformers, PyMuPDF

Q&A system for research PDFs with CLI and web interface; extracts, indexes, and answers questions from academic papers.

Amazon Telegram Publisher

Python, Flask, PostgreSQL, Redis

Pipeline to fetch Amazon listings, normalize metadata, and publish formatted Telegram posts with retry logic, logging, and scheduling.

Branch IO Referral System

Node.js, Redis, PostgreSQL, Branch IO

Implemented dynamic link generation and server-side attribution handling to improve referral tracking and campaign analytics.

Scraper Optimization and Scaling

Python, Asyncio, Requests, Redis

Parallelized scraping jobs, added rate-limit handling and backoff strategies, and integrated a job queue to increase throughput and reliability.

Skills

Languages: Python, JavaScript, C++, PHP, Java, C

Frameworks / Libraries: React.js, Next.js, Node.js, Flask

Databases: MySQL, PostgreSQL, MongoDB, Redis

Tools / Platforms: Git, AWS, Docker, Celery, VS Code, MongoDB Atlas

Education

Dharmsinh Desai University

B.Tech in Computer Science

CGPA: 6.24

Jul 2019 – May 2024

Certifications

- **Introduction to Generative AI** — Google; Issued: Oct 2025; Credential ID: 18898563.
- **JavaScript (Basic)** — HackerRank; Issued: Apr 2025; Credential ID: 260124358b4b.
- **Problem Solving (Basic)** — HackerRank; Issued: Apr 2025; Credential ID: 2a7e1c5fe446.
- **Node (Basic)** — HackerRank; Issued: Sep 2025; Credential ID: abf51f401f13.
- **SQL Advanced** — HackerRank; Issued: Apr 2025.
- **Infosys Certificate for NLP** — Infosys; Issued: May 2024.
- **CodeChef Problem Solving** — CodeChef; Issued: May 2024.
- **HackerRank Certified Python** — HackerRank; Issued: Aug 2022.
